

## generate the optimal follow-up prompt to this that would advance this case's status in our favor the most for github copilot mcp

Of course. This is the optimal, action-oriented prompt to delegate to your GitHub Copilot MCP. It transforms the raw data and strategic analysis into a structured, attorney-ready evidence package, which is the single most critical step to advance this case.

This prompt is designed for immediate execution, assuming [Otter.ai](#) will deliver its evidence extraction imminently.

### GitHub Copilot MCP Prompt: "PROJECT HYDRA - CHASE EVIDENCE SYNTHESIS"

Copy and paste this entire block directly to your GitHub Copilot MCP:

#### "IMMEDIATE ACTION: PROJECT HYDRA - CHASE EVIDENCE SYNTHESIS"

**OBJECTIVE:** Synthesize all raw case files, transcripts, and the `Otter_Evidence_Extraction_Chase_Case_Oct31.md` file into a unified, attorney-ready evidence compendium. The goal is to build the foundational exhibits for the TRO motion and make the case so clear and evidence-backed that it forces an early, favorable settlement.

**PRIMARY DIRECTIVE:** Create a new directory `/Chase_Litigation/Attorney_Review_Package_Nov_2025/`. Within this directory, generate the following structured markdown files. Use the extracted quotes from the [Otter.ai](#) file as the primary source for all claims.

#### 1. `01_OBSTRUCTION_TIMELINE_EXHIBIT_A.md`

Create a detailed, chronological table of Chase's 50-day obstruction from August 14 to October 3, 2025.

- **COLUMNS:** Date | Event | Chase Employee(s) | Obstruction Tactic | Supporting Evidence (Transcript Timestamp / Document)
- **KEY ENTRIES:**
  - **Aug 14:** Initial in-person meeting at Longview branch.
  - **Aug 27:** Chris Salinas (Global Security) freezes accounts based on subjective "discomfort."
  - **Sept 9:** Chase sends formal POA rejection letters (NOTE: Eric Jones has hard copies).

- **Sept 13:** Denise (El Monte Branch) admits 4x there is no written policy and that the situation is "odd."
- **Sept 15:** Eric provides recorded authorization (Exhibit K-4a) and medical impossibility proof (Exhibit K-4b).
- **Sept 16:** Eric sends formal demand email with TRO threat and audio/transcript evidence to Chase executives and legal counsel.
- **Sept 26:** 10 days *after* receiving incontrovertible proof, Leatha Goldstein finally approves POA, but claims Kathy authorized a \$12,100 transfer 3 days prior.
- **Oct 3:** POA documentation is finally notarized at Temple City branch.

## 2. 02\_BAD\_FAITH\_EVIDENCE\_EXHIBIT\_B.md

Structure this document to prove Chase acted in bad faith, demonstrating willful disregard after being put on notice.

- **Section 1: The September 16th Notice.** Quote the September 16 formal demand email. State clearly: "As of September 16, 2025, at 8:51 PM, JPMorgan Chase, its executive office, and its legal counsel were in possession of recorded, unambiguous proof of (a) Kathy Hart's authorization and (b) the medical impossibility of an in-person visit."
- **Section 2: Ten Days of Willful Inaction.** Document the 10-day period from September 16 to September 26 where Chase took no action, despite having received the evidence and a TRO threat.
- **Section 3: The Contradictory Rejection Letters.** Create a placeholder for the September 9th letters, noting: "These letters, sent while Chase was verbally claiming to be 'reviewing' the POA, prove a pattern of internal contradiction and bad faith communication."
- **Section 4: The False Statement by Leatha Goldstein.** Juxtapose Leatha's claim from September 26 (that Kathy authorized a \$12,100 transfer on Sept 23) with the direct denial from Kathy's call transcript (to be supplied by Otter.ai prompt #1). Label this "Evidence of Misrepresentation."

## 3. 03\_ADA\_VIOLATION\_EXHIBIT\_C.md

Compile all evidence supporting the failure to provide reasonable accommodation.

- **Section 1: Medical Impossibility.** Use quotes from Exhibit K-4 (Sept 15 transcript) where Kathy describes her post-surgical, bedridden state, the facility prohibition on leaving, and that an in-person visit is "medically impracticable."
- **Section 2: Repeated Notice.** List every instance from the transcripts where Eric informed a Chase employee (Leatha, Jeffrey, Denise, Chris Salinas) that Kathy could not appear in person due to her medical condition.
- **Section 3: Refusal to Accommodate.** Document that despite these repeated notices and the provision of recorded proof on September 16, Chase's final approval on September 26 *still* required an in-person visit for notarization, which was only completed on October 3. This demonstrates a failure to accommodate for the entire 50-day period.

#### 4. 04\_FRAUD\_LEDGER\_TEMPLATE\_EXHIBIT\_D.csv

Generate a CSV template to document the financial harm that occurred during the obstruction period.

- **COLUMNS:** Transaction Date | Merchant/Payee | Amount | Account Debited | Suspected Perpetrator (Lesley, Kim, etc.) | Notes (e.g., 'Occurred 5 days after Chris Salinas froze account, blocking protective action')
- **ACTION:** Populate this ledger with all unauthorized transactions identified by Otter.ai prompt #8. Sum the total financial loss at the bottom.

#### 5. 05\_KATHY\_HART\_SWORN\_DECLARATION\_DRAFT.md

Draft a declaration for Kathy Hart to sign. Use her own words from the September 15th (Exhibit K-4) transcript.

- **Paragraph 1:** "I, Kathy Hart, declare under penalty of perjury..."
- **Paragraph 2:** "On [Date], I executed a Texas Statutory Durable Power of Attorney appointing Eric B. Jones as my agent..."
- **Paragraph 3:** "On September 15, 2025, I stated on a recorded call, 'I authorize JP Morgan Chase to rely on my POA without requiring an in-person visit... in person is medically impracticable because [insert quote about back surgery/bedridden status].'"
- **Paragraph 4:** "On that same call, I stated, '[Chase] has done only one thing, freeze my account and leave me paralyzed.'"
- **Paragraph 5:** "I did not speak with Leatha Goldstein on September 23, 2025, nor did I authorize a \$12,100 transfer from my joint account. [Insert verbatim denial from Otter.ai prompt #1]."
- **Paragraph 6:** "The unauthorized transactions listed in Exhibit D occurred because my agent, Eric Jones, was blocked by Chase from securing my accounts."

**FINAL COMMAND:** Upon completion, create a README.md in the root of the /Attorney\_Review\_Package\_Nov\_2025/ directory. This README should list the 5 generated files and provide a one-sentence summary for each. Set the status of 'PROJECT HYDRA' to **COMPLETE - PENDING ATTORNEY REVIEW**. Stand by for further instructions after November 6."
