Attachments: URGENT RISK ALERT Unauthorized Minor Intake & Procedural Violation (StrengthUnhededCSUN).png

Mr. Quinones,

Attached herein (by reference) is the Compliance Alert filed today with CSUN Risk Management and Dignity Health regarding the unauthorized intake of a minor child orchestrated by your client's network.

We have initiated a formal audit of the "warm handoff" from Detective Cordova to the StrengthUnited facility. This matter is now under institutional review.

I am writing to you directly, as Chief Advocate for Ms. Sayegh, to inquire whether your firm is prepared to carry the liability of a client who is actively weaponizing social services against a protected party. Given the liquidity requirements for defending a verified conspiracy claim, we strongly suggest you evaluate your exposure.

Govern yourself accordingly.

Eric B Jones,
Chief Domestic Violence Advocate for Nuha, Mia, and Jordan Sayegh
Founder, Recovery Compass

URGENT RISK ALERT: Unauthorized Minor Intake & Procedural Violation (StrengthUnited/CSUN)

Dear Ms. Telles and Executive Leadership,

I am filing a formal Risk Management and Compliance alert regarding a serious procedural violation that occurred at the StrengthUnited facility (a CSUN chartered center) on December 19, 2025.

The Incident

I brought my minor daughter to StrengthUnited at the specific direction of Detective Cordova (LASD) for a law enforcement forensic interview regarding a criminal investigation.

Upon arrival, Detective Cordova was not present. Instead, an individual identified only as "Jennifer" (calling from a Northridge Hospital line 818-XXX-XXXX and cell 909-261-1175) attempted to commandeer the interaction.

Compliance Violations & Risk Exposure

- 1. Unauthorized Intake Attempt: "Jennifer" attempted to process my minor daughter for therapeutic "intake" and enrollment in services.**
- 2. Lack of Consent: I explicitly DECLINED all medical, therapeutic, and counseling services. I consented ONLY to the forensic interview for evidence gathering.**
- 3. Warm Handoff Anomaly: The absence of the scheduling Detective and the immediate pressure for "Intake" suggests a coordinated effort to convert a criminal witness into a patient without informed consent.**

Immediate Demands for Risk Mitigation

1. Identify "Jennifer": Please provide the full legal name, title, and licensure of this staff member.
2. Records Audit: Confirm in writing that NO "patient" file, medical record, or "intake" record was created for Mia Sayegh. If one exists, it must be immediately flagged as RESTRICTED / DO NOT RELEASE due to unauthorized creation.
3. Preservation: Preserve all communications between "Jennifer" and Detective Cordova regarding this appointment, as they are relevant to an active legal dispute regarding witness interference.

We are documenting this as a potential violation of parental rights and unauthorized medical processing of a minor.

Please respond within 24 hours confirming the status of any records generated during this visit.

Respectfully,

Nuha Sayegh
