Subject: Confirmed — Option A underway: CSS filed + Tyler note + housing push

Nuha,

Prime directive: secure housing fast with minimal intrusion.

Governing principles: keep touchpoints light, create official income documentation, and move applications now.

What I'm executing now (Option A)

- CSS intake: filing online with father's **paystubs** attached; I'll send the 10‑minute checklist in a separate note for any missing fields.
- Tyler (DCFS) case note: drafting a one‑paragraph verification for housing stability and "CSS case initiated today"; I'll ask her to confirm paystub receipt.
- Housing: using "CSS case initiated + paystubs on file" in your advocate packet to push approvals on vetted rentals today.

What I need from you (fast)

- Reply with the checklist items if any are missing: full names/DOBs, SSN, current address, father's contact.
- If you call Tyler, use this line: "Please add a case note that we initiated CSS today to stabilize housing and confirm receipt of the father's paystubs."

Next milestones today

- Send first housing options aligned to your priorities and begin applications.
- Log confirmations from CSS intake and Tyler's note; share the case number once issued.

Bottom line: we're moving on support documentation now so landlords can approve you without delays or extra office visits.
